

Privacy

Any personal information you provide to us on our website when you register or purchase tickets, (i.e. name, address, e-mail address, telephone number and credit card information) is maintained in private files on our secure Web server and our internal systems. Your personal information will not be shared with anyone. We will not sell, rent or share your email address with others for them to send you unsolicited email.

Security

The security of your information is very important to us. We use the 128-bit Secure Socket Layer (SSL) technology to protect the security of your online order information. SSL technology encrypts your order information to protect it from being decoded by anyone other than The Hartford Fair. Once you enter the checkout page your computer will begin communicating with our server in secure mode. You can tell that you are in secure mode by the following:

- The "http" in the web address will be replaced by "https"
- Depending on the browser, you may see either a padlock (Microsoft Internet Explorer, AOL, Netscape Communicator) or a solid key (Netscape Navigator) in the lower section for the browser window.

Only browsers that use the 128-bit Secure Socket Layer technology are able to order through the Hartford Fair site. If your browser does not support SSL, you can get an upgrade at [Microsoft's](#) or [Netscape's](#) home page.
