What is Beef Quality Assurance?

Beef Quality Assurance is a nationally coordinated, state implemented program that provides systematic information to U.S. beef producers and beef consumers of how common sense husbandry techniques can be coupled with accepted scientific knowledge to raise cattle under optimum management and environmental conditions.

BQA guidelines are designed to make certain all beef consumers can take pride in what they purchase – and can trust and have confidence in the entire beef industry.

3

#1 Use an Appropriate Veterinarian/Client/Patient Relationship (VCPR) as the Basis for Medication Decision-Making

- Be sure to contact your vet before you get your project for the next year
- Your vet needs to know the species and the quantity of each species you will be responsible for the year to help achieve your project goals
- Make a plan with your vet for when you will be vaccinating and deworming your animals to be clear of all withdraw times

4

#2 Establish and Implement an Efficient and Effective Health Management Plan

- Key to food safety
- Increases production and efficiency
- Requires less medical care
- Beneficial impact on animals' health through use of measures such as:
 - Vaccination plans
 - Biosecurity protocols
 - Emergency preparedness

Daily Evaluation of Livestock

- Average Daily Gain (ADG)
- Feed Efficiency (FE)
- Physical Evaluation
- Disease
- Behavior Abnormalities

5

#3 Use Antibiotics Responsibly

- Treatment of illness
- Control and prevention of disease
- Improve nutritional efficiency

6

Basic Classes of Drugs

Over-the-Counter Drugs (OTC)

- Can be purchased without a prescription
- Should consult veterinarian before use
- MUST follow label instructions EXACTLY

Prescription Drugs (R_x)

- Drugs that require a veterinarian's written permission for use (prescription)
- Label of a R_x drug will state
 - "CAUTION"
 - "Federal law restricts use by or on the order of a licensed veterinarian"

7

Types of Drug Use

1. Label Use

- Using the drug EXACTLY as stated on the label

2. Off Label

- Use of a drug in a manner other than what is stated on the label AND without guidance from a veterinarian under the extra-label policy

- Question??
 - What are the FOUR routes of Administration?

10

#5 Follow Proper Feed Processing Protocols

Storing Feed

Bulk Feed

Feeding on the Road

Red Bucket Feed

11

#6 Establish Effective Animal Identification, Medication Records and Withdrawal Times

- EID
- Visual Ear Tag
- Tattoo
- DNA
- Freeze Branding
- Hot Branding

Important management tool for producers

- Performance measurements
- Identify treated animals
- Track ownership and movement
